

# Joint exhibitor-hosted sessions

## Can We Learn More from Our Göttingen Minipig Toxicology Studies?

Joint exhibitor-hosted session with

Tuesday, March 15, 1:30 PM to 2:30 PM in room 205

The Göttingen minipig is widely used for regulatory toxicology. Safety pharmacology endpoints can be added to the same studies or taken as stand-alone studies. Strategies to evaluate cardiovascular, respiratory and central nervous system pharmacology using the minipig will be presented. The seminar will allow time for discussions and questions.

Speaker: Andy Makin, CiToxLAB Scantox

## The Minipig as a Model for Preclinical Cardiac Safety Testing

Joint exhibitor-hosted session with

Wednesday, March 16, 10:30 AM to 11:30 AM in room 211

Preclinical safety testing requires both rodents and non-rodents. Dogs are most commonly used but may not always be suitable. Lately, pharmaceutical companies and CRO's have characterized the Göttingen Minipig for both in vitro and in vivo safety testing. Preliminary data from reference compounds will be presented. The session will allow time for discussion and questions.

Speaker: Michael Markert, Boehringer-Ingelheim Pharma
