Application and CV

plus relevant attachments in English or Danish should be emailed to HR@minipigs.dk marked "Chief Scientific Officer" no later than 25 March 2020

Ellegaard Göttingen Minipigs

is the leading global breeder, developer and supplier of Göttingen Minipigs for biomedical research

We set high standards through our values: Animal Welfare, Quality, Respect & Collaboration

Ellegaard Göttingen Minipigs is looking for an experienced CSO. The position is referring directly to the CEO and you will be part of the management team as well as managing our scientific team.

Our unique brand builds on more than 50 years of history and has expanded from being a European high-quality breeder and supplier of Göttingen Minipigs into a globally leading scientific partner and provider of not only Göttingen Minipigs, but also several characterized and validated Göttingen Minipigs-based disease models – all based on a strong scientific approach.

The position as CSO

Your tasks and responsibilities include:

- scientific input and sparring supporting the continued growth of the company
- scientific support to customers, colleagues and scientific partners
- continued and focused characterization of the Göttingen Minipig through in-house projects and participation in collaborative scientific projects with external partners
- management of the scientific team through motivation, support and encouragement including assistance to the laboratory animal veterinarian
- knowledge dissemination as author and co-author of scientific papers, presentations at conferences and customer visits, articles in our scientific Göttingen Minipigs Magazine and postings on social media

What we expect

We would like you to:

- have a veterinary or natural science degree and several years of experience within biomedical research and preferably business development and/or project management
- be experienced in working with laboratory animals and preferably minipigs
- understand customer needs and have a strong commercial mindset
- have profound management skills
- are a proactive, engaging, service-minded and flexible person with a high drive and experience in working in a diverse environment and not least: you are a team player
- have a structured approach and are good at maintaining the overview
- are fluent in written as well as spoken English and have excellent communication and collaboration skills

The daily workplace will be in Dalmose, however with frequent travel activities.

We offer a full-time position, a competitive salary package with health insurance and pension scheme, a nice and informal working environment, as well as opportunities for further professional and personal development.

**We enable development of safer
and more effective medicines**
