

Senior Laboratory Technician

Ellegaard Göttingen Minipigs A/S is looking for an experienced Senior Laboratory Technician to assist in the planning, coordinating, execution and reporting of in vivo studies in Göttingen Minipigs. The position refers to the Head of Scientific Management and you will be part of our expanding Science Team. You will work and collaborate closely with your colleagues in both the Science Team, our entire organization plus external partners and customers to ensure high quality execution of study activities.

Ellegaard Göttingen Minipigs A/S is the leading global breeder and supplier of Göttingen Minipigs for biomedical research and likewise conducts related research services. Our purpose is to enable development of safer and more effective medicines, and we do this by setting high standards and honouring our values: Animal Welfare, Quality, Respect, and Collaboration.

Your primary tasks and responsibilities:

- Plan and coordinate study activities in collaboration with the Head of Scientific Management
- Actively participate in study activities and related research service offerings
- Ensure timely follow-up on internal and external scientific projects
- Safeguard that all data, samples and any protocol divergences are properly handled and communicated and write final study reports
- Actively share your knowledge, experience and skills

We offer:

- an exciting, constantly developing international workplace focusing on the welfare of our animals as well as our employees
- a nice and informal cross-functional working environment with opportunities for further professional development
- a full-time position
- a competitive salary package with health insurance and pension scheme

The daily workplace is in Dalmose outside Slagelse, with limited travel activities. We would like to welcome you on 1 October 2021.

We expect that you:

- have a degree as Laboratory Technician ('laborant') or similar education and several years of relevant practical working experience within biomedical research
- are experienced in writing study plans and study reports plus other administrative activities in relation to in vivo studies
- are a team player with a proactive, service-minded and flexible mindset
- have a structured and meticulous approach and are good at maintaining the overview, yet with attention to detail
- have excellent communication skills and are fluent in written as well as spoken Danish and English

More information and application
