

Exclusion list

Notifiable diseases

Following agents in our HMR are notifiable diseases in Denmark. Positive findings are reported to the Danish Veterinary and Food Administration in accordance with Danish law:

- Aujeszky's Disease
- Classical Swine Fever (CSF)
- Porcine Epidemic Diarrhoea (PED)
- Porcine Reproduct. & Resp. Syndrome (PRRS)
- Transmissible Gastroenteritis (TGE)
- Leptospira spp.
- Salmonella spp.

Special surveillance

Following agents in our HMR are under special surveillance, and unexpected positive findings in our health monitoring program are addressed by the Laboratory Animal Veterinarian and Chief Scientific Officer. Relevant measures are taken depending on the agent in question. This can include further diagnostic analysis, re-testing of the epidemiological unit, changes to hygienic and preventive measures, etc.

- Haemagglutinating Encephalomyelitis (HEV)
- Porcine Circovirus type 2 (PCV2)
- Influenza A, all subtypes
- Porcine Parvovirus
- Porcine Respiratory Coronavirus (PRCV)
- Actinobacillus pleuropneumoniae
- Brachyspira (Serpulina) hyodysenteriae
- Clostridium perfringens type C
- Erysipelothrix rhusiopathiae
- Methicillin resistant Staphylococcus aureus (MRSA)
- Mycoplasma hyopneumoniae
- Pasteurella multocida toxin (PMT)
- Staphylococcus hyicus
- Streptococcus suis
- Yersinia enterocolitica
- Microsporium spp.
- Trichophyton spp.
- Arthropods
- Helminths
- Coccidia (Eimeria, Isospora)
- Cryptosporidia
- Toxoplasma gondii
