## **We enable development of safer and more effective medicines**

*We believe in the value of scientific validity, research, background data, and collaboration, and invest an increasing share of our resources in the development and accumulation of new knowledge about Göttingen Minipigs, and in networking with scientists working actively with our animals.*

## **ELLEGAARD ••** GÖTTINGEN MINIPIGS

Ellegaard Göttingen Minipigs A/S breeds and supplies genetically well-defined and healthy Göttingen Minipigs for biomedical research. From our AAALAC-accredited facility in Denmark, we breed Göttingen Minipigs and IgG Humanized Göttingen Minipigs, and provide research services to enable the development of safer and more effective medicines.

Göttingen Minipigs are fully recognized as an established animal model by all regulatory authorities worldwide and should always be considered when choosing a non-rodent animal

model for preclinical studies due to their unique health status, well-documented genetic background, similarity to humans, and availability in large, uniform groups. They are bred in independent, full-barrier, SPF facilities to ensure high microbiological quality, and their well-defined health status is recorded in Health Monitoring Reports based on FELASA recommendations.

All of this based on our core values: Animal welfare, Quality, Respect, and Collaboration.

# Recommended papers on Göttingen Minipigs in biomedical research

Since the introduction of Göttingen Minipigs to the market in the 1980s, hundreds of scientific papers have been published about studies involving Göttingen Minipigs, proving their relevance as a non-rodent animal species in biomedical research. On the following pages, a selection of papers has been grouped in topics to illustrate areas in which Göttingen Minipigs have excelled. It is important to note, that **the list of topics and papers is far from exhaustive**, but includes a selection of papers with a more general approach, which have contributed to the general understanding and characterisation of Göttingen Minipigs as a large animal model.

Ellegaard Göttingen Minipigs strives at collecting all available knowledge and relevant publications about Göttingen Minipigs in biomedical research. If you are looking for something specific, or references to a topic not included on the list, please contact [science@minipigs.dk](mailto:science@minipigs.dk).
